

PipeStax[®]

Modular Pipe Support Blocks

Overview:

Rain for Rent's unique PipeStax[®] are modular and durable pipe support blocks. By stacking the interlocking PipeStax blocks to your desired elevation, your hose and pipe will be stable and safe. PipeStax can easily be added to your existing temporary makeshift support system, i.e. timber beams or struts. By removing piles of wood from your jobsite, tripping hazards are reduced. PipeStax are reusable, do not splinter and do not absorb liquid like typical wood used for cribbing.

Features and Benefits:

- PipeStax cradling design prevents pipe from rolling
- PipeStax will stabilize pipe during fabrication, welding or any temporary application
- PipeStax modular design make them easy and secure to stack and adjustable to your desired elevation
- PipeStax can be anchored to wood cribbing, asphalt or other surfaces
- High visibility colour for safety
- Lightweight construction make PipeStax easy to transport
- Prevent pipe or hose from sagging, this relieves stresses that may cause premature failure
- Protect aluminum pipe from corrosive soil by suspending it above the ground using PipeStax

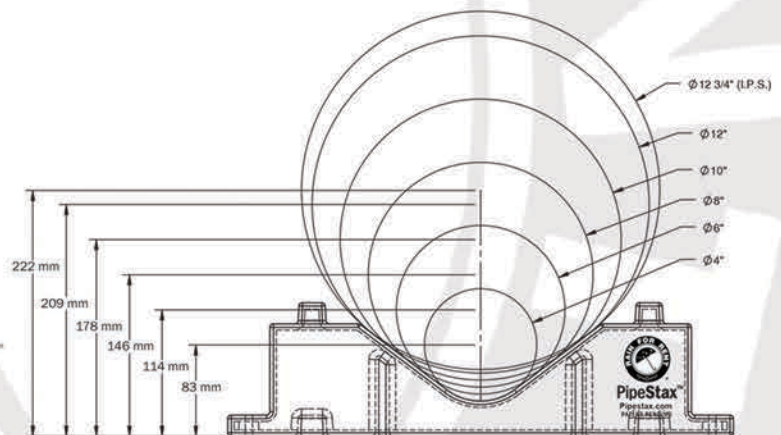

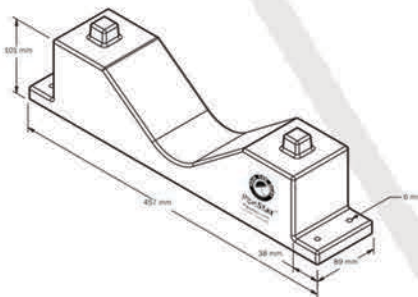

Specification:

- Moulded UV-stabilised HDPE construction
- 457 x 89 x 101 mm
- Supports pipe up to 12"
- Weight per PipeStax: 0.9 kg

Load Chart:

Temp. Celcius	4" Pipe	6" Pipe	8" Pipe	10" Pipe	12" Pipe
